

INDUSTRIAL ENGINE RATINGS GUIDE

CAT[®]
LET'S DO THE WORK.™

Customer Value	4
Cat® Engines	5
EU Stage V Engines	6-12
U.S. EPA & CARB Tier 4 Final Engines	13-18
China Nonroad Stage IV	19-21
UN ECE R96 Stage IIIA or Below	22-34
Basic Specifications	35-37

Premium Engines and Components

Able to meet the toughest challenges in the harshest conditions, Cat® engines are built to fill your needs. Easy to repair, service, and rebuild they're ready to deliver a lifetime of low-cost productivity. With Cat Finance packages we can even assist in your product purchase.

Aftermarket Care

Whether you want urgent repairs and parts or just access to quality technical advice, your Cat dealer is always on hand. Our dealer network is available worldwide, offering same-day or next-day delivery and an expert team that manages every aspect of servicing and maintenance.

On-Site Productivity

Reduce machine downtime and running costs to increase the productivity and profitability of your operations. We deliver the latest technology to help you stay ahead of the competition and keep your equipment running at maximum efficiency. Our goal is to make sure you get full value from your engines, right from the start.

The charts represent only a selection of the power ratings available from the Cat industrial engine range and may not yet be in full production. Other emission standards may be available. Contact your Cat dealer www.cat.com/dealer for advice for your power train.

Diesel Engine Ratings Definitions

IND-A: (Continuous): Continuous heavy-duty service where the engine is operated at maximum power and speed up to 100% of the time without interruption or load cycling.

IND-B: For service where power and/or speed are cyclic (time at full load not to exceed 80%).

IND-C: (Intermittent): Is the horsepower and speed capability of the engine where maximum power and/or speed are cyclic (time at full load not to exceed 50%).

IND-D: For service where maximum power is required for periodic overloads (time at full load not to exceed 10% of the duty cycle).

IND-E: For service where maximum power is required for a short time for initial starting or sudden overload. For emergency service where standard power is unavailable (time at full load not to exceed 5% of the duty cycle).

Rating conditions for engines up to and including 7.1 liter displacement are based on ISO/TR14396.

Ratings for engines above 7.1 liter displacement are based on SAEJ1995.

Abbreviations for Engine Aspirations

NA = Naturally Aspirated

T = Turbocharged

TA = Turbocharged and Aftercooled

TTA = Twin turbocharged and Aftercooled

Abbreviations for Aftertreatment

DOC = Diesel Oxidation Catalyst

DPF = Diesel Particulate Filter

SCR = Selective Catalytic Reduction

Information is subject to change without notification.
